<b>Appendix CH-003-022</b>	<b>i</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Structure of the cultural heritage appendices	1
1.2 Impact assessment	1
<b>List of tables</b>	
Table 1: Impact assessment table	2

**1**      **Introduction**

**1.1**      **Structure of the cultural heritage appendices**

1.1.1      The cultural heritage appendices for Whittington to Handsacre (CFA22) comprise:

- Appendix CH-001-022– Baseline report;
- Appendix CH-002-022 – Gazetteer of heritage assets;
- Appendix CH-003-022 – Impact assessment table (this appendix); and
- Appendix CH-004-022 – Survey reports.

1.1.2      Maps referred to throughout the cultural heritage appendices are contained in the Volume 5 cultural heritage map book.

**1.2**      **Impact assessment**

1.2.1      Table 1 presents information on the impacts on all identified heritage assets and the likely resultant environmental effects, taking into account agreed mitigation measures. Details on the assignment of values and the assessment of the scale of impacts are set out in the Scope and Methodology Report (Volume 5: Appendix CT-001-000/1) and the Scope and Methodology Report Addendum (Volume 5: Appendix CT-001-000/2).

Table 1: Impact assessment table

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA006	Milepost	N/A	Low	The Proposed Scheme will run 500m away to the east. The setting of the milepost will not be affected.	No change	Neutral	No impact on significance.	No change	Neutral
WHA009	All the Winds	N/A	Low	<p>The realignment of the Tamworth Road will temporarily affect historic access to the asset adversely changing its setting. This will result in a low adverse temporary impact and minor adverse effect.</p> <p>There will be no long term impact on the historic setting of the asset or to its views which are to open fields to the south and onto the Tamworth Road.</p>	Temporary Low adverse  Permanent No change	Temporary Minor adverse  Permanent Neutral	There will be a slight increase in noise. This will result in a minimal adverse impact. There will be no permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will result in a minimal adverse impact.	Minimal adverse	Negligible adverse
WHA010	Bailey's Beating	N/A	Low	The Proposed Scheme will have no impact on the asset's historic setting or views which are to open fields to the south and onto the Tamworth Road.	No change	Neutral	No impact on significance.	No change	Neutral
WHA011	Freeford Manor East Lodge	N/A	Low	The Proposed Scheme will have no impact on the asset's historic setting or views which are to open fields to the south, towards the Freeford Estate, and onto the Tamworth Road.	No change	Neutral	No impact on significance.	No change	Neutral
WHA012	York Cottage	N/A	Low	The Proposed Scheme will run more than 500m from the asset and beyond Marsh Lane. No change to setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA013	Thimble Hall Cottage	N/A	Low	The Proposed Scheme will lie approximately 400m from the asset, beyond Whittington Common Road and will be screened to the west by woods around the golf course. There will however be longer distance views down the main line to the north. These will slightly degrade the largely rural setting of the asset.	Low adverse	Minor adverse	There will be an increase in noise. This will adversely affect the rural setting of the asset resulting in a medium adverse impact. There will be a low permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will result in a medium adverse impact.	Medium adverse	Minor adverse
WHA014	Brewery Farm	N/A	Low	The Proposed Scheme will run more than 600m from the asset, beyond Whittington Common Road and is screened to the west by woods on the golf course. There will be longer distance views of the main line to the north west but these will not materially alter the setting and significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA015	Hollybank	N/A	Low	The main line of the Proposed Scheme will lie over 800m from the asset and beyond Marsh Lane. There will be longer distance views of the main line but these will not materially alter the setting and significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA016	Horse and Jockey	N/A	Low	The main line of the Proposed Scheme will lie over 800m from the asset and beyond Marsh Lane. There will be longer distance views of the main line but these will not materially alter the setting and significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA018	Ellfield House and Lodge	N/A	Low	<p>Earthworks for the Proposed Scheme will be constructed adjacent to outbuildings at this asset and one outbuilding will be demolished, works will last for approximately 1 year. There will be temporary disruption of the historic landscape setting of the asset during earth moving and there will be a noise impact. This will result in a high adverse temporary impact and moderate adverse effect.</p> <p>Open field views will be curtailed by the constructed Scheme, and the historic landscape setting of the asset westwards, including views to Whittington Hill House, will be disrupted. The Proposed Scheme will dominate and considerably alter the current rural setting of the asset. This will result in a high adverse permanent impact and moderate adverse effect.</p>	Temporary High adverse  Permanent High adverse	Temporary Moderate adverse  Permanent Moderate adverse	There will be an increase in. This will result in a high adverse impact. There will also be high adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a high adverse impact.	High adverse	Moderate adverse
WHA022	Whittington Hill House and Hill Farm	N/A	Low	<p>Earthworks for the Proposed Scheme will be constructed adjacent to this asset; works will last for approximately 1 year. There will be temporary disruption of the historic landscape setting of the asset during earth moving and there will be a noise impact. This will result in a high adverse temporary impact and moderate adverse effect.</p> <p>The constructed Scheme will curtail open field views and historic access will be changed with the realignment of Darnford Lane. Historic views to Ellfield House will be lost. The Proposed Scheme will dominate and considerably alter the current rural setting of the asset. This will result in a high adverse permanent impact and moderate adverse effect.</p>	Temporary High adverse  Permanent High adverse	Temporary Moderate adverse  Permanent Moderate adverse	There will be an increase in noise. This will result in a high adverse impact. There will also be high adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a high adverse impact.	High adverse	Moderate adverse
WHA024	Marsh Farm, Darnford Lane	N/A	Low	<p>Earthworks for the realignment of Darnford Lane will take place less than 50m away; the works for the man line will lie approximately 200m to 300m to the east. There will be temporary disruption, approximately 1 year, of the historic landscape setting of the asset and there will be a noise impact. These changes will result in a low adverse temporary impact and minor adverse effect.</p> <p>The constructed Scheme will run on embankment approximately 300m to the east, this will curtail open field views and disrupt the rural setting of this agricultural asset. This will result in a permanent medium adverse impact and minor adverse effect.</p>	Temporary Low adverse  Permanent Medium adverse	Temporary Minor adverse  Permanent Minor adverse	Impact on the setting of the asset due to the visual presence of the operational scheme. There will also be an increase in noise. These changes will alter the rural setting of the asset resulting in a medium adverse impact. There will also be medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter the general rural setting of this asset, resulting in a medium adverse impact.	Medium adverse	Minor adverse
WHA025	Wren Cottage	N/A	Low	<p>Construction works for the man line will lie approximately 300m to the west. There will be temporary disruption, approximately 1 year, of the rural setting of the asset. This will result in a low adverse temporary impact and minor adverse effect.</p> <p>The constructed Scheme will run on embankment approximately 300m to the west, this will curtail rural views and disrupt the rural setting of this agricultural asset and its relationship with other related local assets. This will result in a permanent medium adverse impact and minor adverse effect.</p>	Temporary Low adverse  Permanent Medium adverse	Temporary Minor adverse  Permanent Minor adverse	There will be an increase in noise. This will adversely affect the rural setting and will result in a medium adverse impact. There will also be medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter the general rural setting of this asset, resulting in a medium adverse impact.	Medium adverse	Minor adverse

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA026	Darnford Lane Cottages	N/A	Low	<p>Construction works for the man line will lie approximately 400m to the west. There will be temporary disruption, approximately 1 year, of the rural setting of the asset. This will result in a minimal adverse temporary impact and negligible adverse effect.</p> <p>The constructed Scheme will run on embankment approximately 400m to the west. The main views from the asset are to the north and the Proposed Scheme will not significantly disrupt the rural setting of this agricultural asset and its relationship with other related local assets. This change will result in a permanent low adverse impact and minor adverse effect.</p>	<p>Temporary Minimal adverse</p> <p>Permanent Low adverse</p>	<p>Temporary Negligible adverse</p> <p>Permanent Minor adverse</p>	There will be an increase in noise. This will slightly adversely affect the rural setting and will result in a low adverse impact. There will also be low adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter the general rural setting of this asset, resulting in a low adverse impact.	Low adverse	Minor adverse
WHA027	Boot Farm Cottage	N/A	Low	The main line of the Proposed Scheme will lie over 600m to the west of the asset. Whilst the embankments of the Proposed Scheme will be visible in longer distance views to the west and northwest of the asset these will not materially later the rural setting of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA028	Holly Cottage	N/A	Low	The main line of the Proposed Scheme will lie over 600m to the west of the asset. Whilst the embankments of the Proposed Scheme will be visible in longer distance views to the west and northwest of the asset these will not materially later the rural setting of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA032	Fulfen Farm	N/A	Low	<p>During construction historic access to the asset will be disrupted by earthworks for Streethay sidings and overhead cable works. The Capper's Lane main compound and material storage site will be situated approximately 250m to the north of asset. The existing A38 has already affected the rural setting of the asset and the temporary works will only slightly further degrade its rural setting. These works will result in a low adverse temporary impact and minor adverse effect.</p> <p>The main line of the Proposed Scheme run on embankment approximately 500m plus from the asset and will feature in views to the north, east and south-east. The existing A38 and WCML have already affected the rural setting of the asset and although the Proposed Scheme will further degrade the asset's rural setting it will not considerably degrade it. The Proposed Scheme will result in a low adverse impact and minor adverse effect.</p>	<p>Temporary Low adverse</p> <p>Permanent Medium adverse</p>	<p>Temporary Minor adverse</p> <p>Permanent Minor adverse</p>	No impact on significance.	No change	Neutral
WHA034	The Plough public house	N/A	Low	The asset's setting is already dominated by the existing railway line; the presence of the Proposed Scheme will not affect its setting or significance.	No change	Neutral	No impact on significance.	No change	Neutral
WHA038	The Anchor Public House	N/A	Low	The asset is situated within an urban area and its setting relates to that area. The Proposed Scheme will run 200m away to the east beyond the A38 and views will be shielded to the north by intervening built form. The Proposed Scheme will not affect the setting or significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA039	Field Cottage, Streethay Cottage and Elverceter	N/A	Low	These buildings will be demolished for construction of the Streethay viaduct and earthworks for the main line.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHAo45	Orchard Farm	N/A	Low	<p>Construction works to the west will disrupt the open rural setting of the asset in this direction. This will result in a low adverse temporary impact and minor adverse effect.</p> <p>The Proposed Scheme will run over 250m to the west on a large embankment. This will curtail open field views towards the Mare Brook and Curborough, and remove a large proportion of the piecemeal enclosure fields that provide the farm's historic setting. The setting of the asset is however already partially characterised by major transport infrastructure. The Proposed Scheme will have a medium adverse impact and minor adverse effect.</p>	Temporary Low adverse  Permanent Medium adverse	Temporary Minor adverse  Permanent Minor adverse	The rural setting of the asset will e slightly denuded by the visual presence of the operational scheme. This will result in a low adverse impact. There will also be medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter characteristics of the setting of this asset resulting in a medium adverse impact.	Medium adverse	Minor adverse
WHAo46	Rough Stockings	N/A	Low	This asset will be demolished for construction of the scheme embankment.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHAo62	Wood End Farm	N/A	Low	The Proposed Scheme will run over 300m away from the asset and will be largely screened from it by existing and proposed planting and vegetation. An access track opposite the farm on Wood End Lane will be altered. The Proposed Scheme will not materially affect the rural s setting of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHAo63	Wood End Small Pox Hospital (site)	N/A	Low	The Proposed Scheme will not affect the below ground remains associated with this asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHAo64	Willow Cottage	N/A	Low	The Proposed Scheme will run over 300m away from the asset and will be largely screened from it by existing and proposed planting and vegetation. An access track adjacent to the asset will be altered. The Proposed Scheme will not materially affect the rural s setting of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHAo65	Wood End Common Barn	N/A	Low	<p>During construction access will be required along the track leading to the asset for at least one year. This disruption and the visibility of the construction works will alter the rural setting of this agricultural asset. This will result in a medium adverse temporary impact and minor adverse effect.</p> <p>The constructed scheme will be 400m away from the asset and whilst much of the scheme will be screened by existing or proposed vegetation the Trent and Mersey Canal viaduct and associated embankments will be visible and this will alter the open rural setting, of the asset. This will result in a medium adverse impact and minor adverse effect.</p>	Temporary Medium adverse  Permanent Medium adverse	Temporary Minor adverse  Permanent Minor adverse	There will be an increase in noise in the vicinity of the Barn. This will result in a medium adverse impact. There will be medium adverse permanent construction impact arising from the altered views from the barn. The combined permanent construction and operational impacts will result in a medium adverse impact.	Medium adverse	Minor adverse
WHAo66	Black Slough Farm	N/A	Low	The Proposed Scheme will run over 300m from the asset and will be screened from the rear of the farm by existing and proposed planting. The Farm's immediate historic pastoral setting will not be affected by the Proposed Scheme.	No change	Neutral	There will be an increase in noise at the asset. This will alter the rural setting off the asset resulting in a medium adverse impact. There will be no permanent construction impact. The combined permanent construction and operational impacts will therefore result in a medium adverse impact.	Medium adverse	Minor adverse

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHAo67	Ravenshaw Cottage	N/A	Not significant	<p>There will be temporary noise impacts during construction and disruption of the asset's quiet woodland setting during removal of woodland and construction of Proposed Scheme embankments. These changes will result in a high adverse temporary impact and negligible effect.</p> <p>There will be clear views of the constructed scheme which is on embankment less than 50m away where currently there are woodland views. This will completely change the character of the asset's setting resulting in a high adverse impact and negligible effect.</p>	Temporary High adverse  Permanent High adverse	Temporary Negligible  Permanent Negligible	There will be an impact on the setting of the asset due to the visual presence of the operational scheme. There will also be an increase in noise. This will result in a high adverse impact. There will also be high adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter the setting of this asset resulting in a high adverse impact.	High adverse	Negligible
WHAo68	Cranberry	N/A	Low	<p>The construction of the Proposed Scheme including the spur will disrupt the asset's rural woodland setting. This will result in a medium adverse temporary impact and minor adverse effect.</p> <p>The fields to the south form part of the local rural setting of the asset and contribute to its significance as an isolated rural dwelling. These will be truncated by the Proposed Scheme which will alter the rural setting of the asset resulting in a medium adverse impact and minor adverse effect.</p>	Temporary Medium adverse  Permanent Medium adverse	Temporary Minor adverse  Permanent Minor adverse	There will be an impact on the setting of the asset due to the visual presence of the operational scheme. There will also be an increase in noise. This will result in a medium adverse impact. There will also be medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter the setting of this asset resulting in a medium adverse impact.	Medium adverse	Minor adverse
WHAo72	Vicar's Coppice House	N/A	Low	The Proposed Scheme, which is over 250m away, will be screened by Vicar's Coppice and landscape planting. The Proposed Scheme will not affect the asset's setting.	No change	Neutral	There will also be a minor increase in noise. This will adversely affect the rural setting of the asset resulting in a low adverse impact. There will be no permanent construction impact. The combined permanent construction and operational impacts will adversely alter the setting of this asset resulting in a low adverse impact.	Low adverse	Negligible adverse
WHAo74	Roundabout Cottage	N/A	Low	Asset lies 400m from the Proposed Scheme beyond the current railway line. Its setting will not be affected by the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHAo75	Yew Tree House	N/A	Low	Asset lies 400m from the Proposed Scheme beyond the current railway line. Its setting will not be affected by the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHAo76	Hanch Reservoir	N/A	Low	Asset lies 400m from the Proposed Scheme beyond the current railway line. Its setting will not be affected by the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHAo79	Shaw House	N/A	Low	<p>During construction a material's transfer area will be situated adjacent to the asset and further to the east beyond that will be the A515 Lichfield Road Underbridge Main Compound. The rural setting of the asset is already characterised by the presence of the WCML but the construction works will represent a considerable disruption of the asset's setting. This will result in a high adverse temporary impact and moderate adverse effect.</p> <p>The constructed scheme will be on embankment approximately 100m to the south west. The WCML interface structures will be situated approximately 200m to the west. The asset's setting already includes the WCML and the Proposed Scheme will increase the visual presence of modern infrastructure in the setting of the asset. This will result in a low adverse impact and minor adverse effect.</p>	Temporary High adverse  Permanent Low adverse	Temporary Moderate adverse  Permanent Minor adverse	There will be an impact on the setting of the asset due to the visual presence of the operational scheme. There will also be an increase in noise. These changes will further change the rural setting of the asset and will result in a medium adverse impact. There will also be a low adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter the setting of this asset resulting in a medium adverse impact.	Medium adverse	Minor adverse
WHAo8o	Hanchwood House	N/A	Low	This asset will be demolished for construction of the Proposed Scheme embankment.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHAo82	Ashton Hayes Farm	N/A	Low	Whilst the asset lies adjacent to the WCML there will still be a notable change to its setting during construction through the presence of satellite compounds, wider construction activity, removal of screening to the WCML and installation of gantries on the existing line. These works will result in a medium adverse temporary impact and low adverse effect.  The constructed scheme will materially alter the asset's setting.	Temporary Medium adverse  Permanent No change	Temporary Minor adverse  Permanent Neutral	There will be an increase in noise. Due to the asset's location adjacent to the WCML this will result in a low adverse impact. There will be no permanent construction impact. The combined permanent construction and operational impacts will adversely alter the setting of this asset resulting in a low adverse impact.	Low adverse	Minor adverse
WHAo83	Newtown	N/A	Low	The Proposed Scheme will run 200m away, on the opposite side of the Lichfield Road and close to the WCML. The Proposed Scheme will not notably alter the setting and significance of the asset.	No change	Neutral	There will be an increase in noise. The asset is situated adjacent to a road and within sight and sound of the WCML. The additional noise will therefore only have a low adverse impact on the significance of the asset.	Low adverse	Minor adverse
WHAo85	West View Cottages	N/A	Low	The Proposed Scheme will run 200m away and close to the current railway line. There will be no change to the asset's setting that affects its significance.	No change	Neutral	There will be an increase in noise. The asset is situated adjacent to a road and within sight and sound of the WCML. The additional noise will therefore only have a low adverse impact on the significance of the asset.	Low adverse	Minor adverse
WHAo89	Barn	N/A	Low	The Proposed Scheme includes the construction of an access track and balancing pound in the field to the south of the asset, this will not materially alter the setting and significance of the asset.	No change	Neutral	There will be an increase in noise. This will result in a low adverse impact. There will be no permanent construction impacts. The combined permanent construction and operational impacts will therefore result in a low adverse impact.	Low adverse	Minor adverse
WHAo90	Hill Farm, Streethay	N/A	Low	The building will be demolished for construction of the Streethay sidings site.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHAo91	Milepost, near Whittington Barracks	N/A	Low	The asset will not be affected by the Proposed Scheme, lying just east of the existing roundabout on the A51.	No change	Neutral	No impact on significance.	No change	Neutral
WHA108	Knowle Lodge, wall and stable	Listed buildings	Moderate	The Proposed Scheme will run over 2km from the asset. There will be no change to its setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA109	Freeford House	Listed building	Moderate	The Proposed Scheme will run over 2km from the asset on the other side of the A38. There will be no change to its setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA119	St Michael's Hospital/Lichfield Union Workhouse	Listed buildings	Moderate	The Proposed Scheme will run over 2km from the asset which is well within the Lichfield conurbation. There will be no change to its setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA122	Huddlesford Grange Farm	Listed building	Moderate	The Proposed Scheme will run 600m from the asset, on the opposite side of the Coventry Canal. There are no views of the scheme, and there is already noise from the existing railway line.	No change	Neutral	No impact on significance.	No change	Neutral
WHA132	Streethay Manor and moated site	Listed buildings and Scheduled Monument	High	The construction of the Streethay Viaduct and Streethay embankment will take over 3 years. During this time there will be disruption to historic access and significant construction activity in the vicinity of the asset. This will considerably alter the setting of the asset, disrupting its relationship with the rural landscape and to Streethay. This will result in a high adverse impact and major adverse effect.  The constructed scheme will have a comprehensive impact on setting of the asset. It will be raised on embankment and viaduct less than 100m from the asset through historically open fields. Historic views towards the Mare Brook will be dominated by the Proposed Scheme and the connection with the eastern part of medieval Streethay will be severed. This will result in a high adverse impact and major adverse effect.	Temporary High adverse  Permanent High adverse	Temporary Major adverse  Permanent Major adverse	There will be an Impact on the setting of the asset due to the visual presence of the operational scheme. There will also be an increase in noise. This will result in a medium adverse impact. There will also be high adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset resulting in a high adverse impact.	High adverse	Major adverse

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA133	Brownsfield Farmhouse	Listed building	Moderate	The Proposed Scheme will run 1.5km away from the asset – there may be long views of the Proposed Scheme at a distance beyond the Mare Brook. These will not affect the farm’s open-field setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA134	Netherstowe Farmhouse	Listed building	Moderate	The Proposed Scheme will run over 2km from the asset which is well within the Lichfield conurbation. There will be no change to its setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA137	Bluegates Farmhouse, barn and granary	Listed buildings	Moderate	The asset is 1500m from the land required for the Proposed Scheme. It will have no views of the line and the significance of its setting will not be affected by the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA138	Curborough Farmhouse	Listed building	Moderate	The Proposed Scheme will run 600m away – the lane between the farmhouse and the Scheme, as well as the woods at Big Lyntus and Little Lyntus will screen views towards the main line. There will be views of the Wood End Lane diversion but these will not detract from the setting of the Farmhouse.	No change	Neutral	No impact on significance.	No change	Neutral
WHA140	Sunnyside Farm	Listed building	Moderate	The Proposed Scheme will run over 1km away beyond the existing railway line. There will be no impact on the asset's setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA141	Porch Cottage	Listed building	Moderate	The Proposed Scheme will run over 1km away beyond the existing railway line. There will be no impact on the asset's setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA142	Milepost on Tewnals Lane	Listed building	Moderate	The Proposed Scheme will run over 1km away beyond the existing railway line. There will be no impact on the asset's setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA143	Seedy Mill, farmhouse and cart shed	Listed buildings	Moderate	The Proposed Scheme will run over 1km away beyond the existing railway line, reservoir and water treatment works. There will be no impact on the asset's setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA150	Fradley Junction Conservation area	Conservation area	Moderate	The Proposed Scheme will run 400m away and views of the Proposed Scheme are screened by existing woodland.	No change	Neutral	No impact on significance.	No change	Neutral
WHA165	Longdon Green Conservation area	Conservation area	Moderate	The Proposed Scheme will run more than 1.5km away, close to the existing railway line. Some buildings within the conservation area will have long views of the scheme but this will not affect the setting of the asset overall.	No change	Neutral	No impact on significance.	No change	Neutral
WHA169	Seedy Mill waterworks	Listed building	Moderate	The Proposed Scheme will run 500m away, beyond the current railway line. There will be no impact on its setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA174	Hill Top hamlet – farm, farmhouse and cottages	Listed buildings	High	The Proposed Scheme will run more than 1.5km away, close to the existing railway line. Some buildings within Hill Top will have long views of the Proposed Scheme but this will not affect the setting of the asset overall.	No change	Neutral	No impact on significance.	No change	Neutral
WHA180	Longdon village	Listed buildings	High	The Proposed Scheme will run more than 1.5km away, close to the existing railway line. There will be no views of the scheme from the historic core of the village.	No change	Neutral	No impact on significance.	No change	Neutral
WHA186	Alrewas Hayes Farmhouse	Listed building	Moderate	The Proposed Scheme will run over 1km away and views will be screened by existing woodland.	No change	Neutral	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA188	Tuppenhurst Farmhouse	Listed building	Moderate	The Proposed Scheme will run 400m away, beyond the Trent and Mersey Canal on the alignment of the current railway line. There will be no significant changes to the asset's setting resulting from the constructed scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA189	Clarkes Hayes	Listed building	Moderate	The building is within the Handsacre conurbation with no views of the Proposed Scheme.	No change	Neutral	There will be an increase in noise. Given the existing urban setting of the asset this will result in a low adverse impact. There will be no permanent construction impacts. The combined permanent construction and operational impacts will therefore result in a low adverse impact.	Low adverse	Minor adverse
WHA190	Hood Lane Farm	Listed building	Moderate	The Proposed Scheme will run over 1km away, with Handsacre village dominating views to the east towards the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA192	Marsh Barn Farmhouse	Listed building	Moderate	The Proposed Scheme will run over 1km away with no clear views of the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA197	Armitage village	Listed buildings	High	The Proposed Scheme will run over 1km away with no clear views of the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA203	Mavesyn Ridware village	Listed buildings, Conservation area	High	The Proposed Scheme will run over 1km away with no clear views of the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA212	High Bridge	Listed building	High	The Proposed Scheme will run over 1km away with no clear views of the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA216	Pipe Ridware village	Listed buildings	Moderate	The Proposed Scheme will run over 1km away with no clear views of the Proposed Scheme.	No change	Neutral	No impact on significance.	No change	Neutral
WHA218	Kings Bromley conservation area	Conservation area	Moderate	The Proposed Scheme will run over 1km away with no clear views of the Proposed Scheme.	No Change	Neutral	No impact on significance.	No Change	Neutral
WHA221	Big Lyntus	Ancient woodland	High	During construction the immediate rural setting of the asset will be affected by the presence of the Trent and Mersey Canal East viaduct (southeast) satellite compound and a large material storage area. There will also be constriction related noise within the woodland during construction. This will result in a low adverse impact and moderate adverse effect.  Once constructed the Proposed Scheme will not interfere with the immediate rural setting of the asset and it will be largely screened in views from the edge of the woodland. There will be no impact on the significance of the asset.	Temporary Low adverse  Permanent No change	Temporary Moderate adverse  Permanent Neutral	There will be an increase in noise audible from within the northern section of the wood. This will result in a minimal adverse impact. There will no permanent construction impact. The combined permanent construction and operational impacts will result in a minimal adverse impact.	Minimal adverse	Minor adverse
WHA222	Ravenshaw Wood	Ancient woodland	High	The Proposed Scheme will run through the northern part of the woodland severing it from the area to the south, and a notable portion will be removed.	Medium adverse	Major adverse	There will be a considerable increase in noise audible from within the remaining woodland which will change the character of this rural woodland. This will result in a medium adverse impact. There will also be medium adverse permanent construction impact as a result of changes to the setting of the asset and to the asset itself. The combined permanent construction and operational impacts will result in a high adverse impact.	High adverse	Major adverse
WHA223	Slaish	Ancient woodland	High	The Proposed Scheme will effectively sever the woodland from its historic landscape context to the south changing its setting and affecting its significance as an element of the area's historic landscape character and form.	Low adverse	Moderate adverse	There will be an increase in noise audible from within the wood. This will result in a low adverse impact. There will also be low adverse permanent construction impact as a result of changes to the setting of the asset and to the asset itself. The combined permanent construction and operational impacts will result in a low adverse impact.	Low adverse	Moderate adverse

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA224	Tomhay Wood	Ancient woodland	High	The main line of the Proposed Scheme will run over 400m from the asset. The Proposed Scheme will not have a material impact on the setting or significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA225	Vicar’s Coppice	Ancient woodland	High	The Proposed Scheme will sever the woodland from its historic landscape context to the north. The existing WCML and Proposed Scheme will essentially bound the asset's setting, affecting its significance as an element of the area's historic landscape.	Low adverse	Moderate adverse	There will be an increase in noise audible from within the wood. This will result in a low adverse impact. There will also be low adverse permanent construction impact as a result of changes to the setting of the asset and to the asset itself. The combined permanent construction and operational impacts will result in a low adverse impact.	Low adverse	Moderate adverse
WHA226	John’s Gorse	Ancient woodland	High	The Proposed Scheme will require the removal of a very substantial portion of the woodland and archaeological features identified in geophysical survey (CNo55).	High adverse	Major adverse	There will be a significant increase in noise audible from within the wood. This will result in a medium adverse impact. There will also be high adverse permanent construction impact as a result of changes to the setting of the asset and to the asset itself. The combined permanent construction and operational impacts will result in a high adverse impact.	High adverse	Major adverse
WHA227	Curborough piecemeal enclosure	Historic Landscape	Low	The Proposed Scheme will bisect the landscape between Orchard Farm and Curborough. Some of these historically enclosed fields will be divided by the scheme, which is on embankment, leading to loss of fabric, coherence and legibility.	High adverse	Moderate adverse	There will be increases in noise affecting the asset's rural character and setting. This will result in a low adverse impact. There will also be high adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a high adverse impact.	High adverse	Moderate adverse
WHA228	Longdon piecemeal enclosure	Historic Landscape	Low	The Proposed Scheme will cross a small portion of the area resulting in localised loss and severance. The majority of the area will remain unchanged as a result of the Scheme.	Low adverse	Minor adverse	No impact on significance.	No change	Neutral
WHA300	Freeford Manor Park	Listed building	Moderate	Impact assessed in CFA21	n/a	n/a	Impact assessed in CFA21.	n/a	n/a
WHA301	Whittington Barracks	Listed buildings	Moderate	The Proposed Scheme will run over 400m from the historic core of the barracks and will not affect views from significant buildings.	No change	Neutral	No impact on significance.	No change	Neutral
WHA302	Whittington Heath Golf Course Clubhouse	N/A	Moderate	The asset will be demolished.	High adverse	Major adverse	No impact on significance.	No change	Neutral
WHA303	Whittington Heath Golf Course	N/A	Low	The Proposed Scheme will remove part of the Whittington Heath Golf Course as it bisects the course in steep cutting and on embankment. The Scheme will alter the historic landscape fabric and character of the course which includes its quiet character, heathland setting and its early 20th century design.	High adverse	Moderate adverse	There will be an increase in noise audible across the golf course. This will result in a medium adverse impact. There will be a high impact arising from permanent changes to the setting of the golf course during construction. The combined permanent construction and operational impacts will result in a high adverse impact.	High adverse	Moderate adverse
WHA304	Whittington village	Conservation area	Moderate	The Proposed Scheme will lie nearly 1km from the edge of the conservation area which stretches in a linear form away from the scheme. There will be no direct views of the scheme from within the historic core of the village. Older fields associated with the village are predominantly to its north and south and will not be affected by the Proposed Scheme to the west.	No change	Neutral	No impact on significance.	No change	Neutral
WHA305	Darnford Mill	N/A	Moderate	The main line of the Proposed Scheme will not affect the asset. Overhead cable works will be required run near to the asset but these will not adversely affect its setting.	No change	Neutral	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA306	Bunyan's Mill at Mill Farm	N/A	Low	Construction of the earthworks for the Cappers Lane viaduct and the satellite compound at Mill Farm will require the complete removal of this asset resulting in total loss of the below ground features.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA307	Medieval Fulfen	N/A	Moderate	The asset lies outside of the land required temporarily or permanently for the construction of the Proposed Scheme and will not be affected.	No change	Neutral	No impact on significance.	No change	Neutral
WHA308	Lichfield Canal – Wyrley and Essington branch	N/A	Low	<p>There will be significant disruption and noise during construction in the vicinity of the Capper's Lane viaduct. This will affect the setting and character of the canal resulting in a medium adverse temporary impact and minor adverse effect.</p> <p>The Cappers Lane viaduct will extend over the disused canal north of Mill Farm, this and the associated embankments will lead to loss of historic context and setting in this section of the asset. This will result in a low adverse impact and minor adverse effect.</p>	<p>Temporary Medium adverse</p> <p>Permanent Low adverse</p>	<p>Temporary Minor adverse</p> <p>Permanent Minor adverse</p>	There will be an increase in noise affecting the asset's quiet rural setting, trains will also be visible. This will result in a low adverse impact. There will also be low adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a low adverse impact.	Low adverse	Minor adverse
WHA309	Coventry Canal	Listed building	Moderate	<p>The local landscape setting of the canal will be severely disrupted during construction by the presence of extensive material storage and the disruption of access to and appreciation of the canal's historic structures at King's Orchard Bridge, Stoney Step Bridge, and a listed milestone between the bridges. This will transform the setting of this area of the canal resulting in a temporary medium adverse impact and moderate adverse effect.</p> <p>Once constructed the Proposed Scheme will be situated on large embankments to the west. The Scheme will alter the relationship between the canal and the local landscape. The setting of the asset is already characterised by major road and rail lines and the Proposed Scheme will intensify this presence. This will result in a low adverse impact and minor adverse effect.</p>	<p>Temporary Medium adverse</p> <p>Permanent Low adverse</p>	<p>Temporary Moderate adverse</p> <p>Permanent Minor adverse</p>	There will be changes in noise levels affecting the asset's quiet rural setting. This will result in a low adverse impact. There will also be low adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a low adverse impact.	Low adverse	Minor adverse
WHA310	Medieval moat and cropmarks	N/A	Moderate	Streethay sidings topsoil strip will require the complete removal of this asset resulting in total loss of the below ground features.	High adverse	Major adverse	No impact on significance.	No change	Neutral
WHA311	Ring ditch	N/A	Moderate	The land required for the Proposed Scheme will run 400m away from the asset. There will be no change to its setting or loss of significance.	No change	Neutral	No impact on significance.	No change	Neutral
WHA312	Enclosure	N/A	Moderate	The asset lies outside of the land required temporarily or permanently for the construction of the Proposed Scheme and will not be affected.	No change	Neutral	No impact on significance.	No change	Neutral
WHA313	Morughale hamlet	N/A	Moderate	The asset lies outside of the land required temporarily or permanently for the construction of the Proposed Scheme and will not be affected.	No change	Neutral	No impact on significance.	No change	Neutral
WHA314	Medieval Streethay	N/A	Moderate	The nature and extent of settlement at Streethay (WHA314) in the medieval period is not known. It is likely that the engineering earthworks, Streethay viaduct and Streethay worksite and compounds will require the removal of some deposits associated with the asset.	Medium adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA315	Roman landscape at Streethay	N/A	Moderate	Engineering earthworks will affect the boundary of this site only. It is highly unlikely that any below ground archaeological features will be lost.	No change	Neutral	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA316	RAF Lichfield	N/A	Low	Engineering earthworks will require the removal of airfield features including dispersal areas, hard standings, buried structures for earthworks and the Wood End Lane diversion, from Orchard Farm as far as Fradley Gorse. The constructed scheme will also sever the relationship between the hangars and the area of the historic flying field.	Medium adverse	Minor adverse	No impact on significance.	No change	Neutral
WHA317	Easthill and Westhill farms	N/A	Low	The Proposed Scheme will run alongside this asset. There will be no change to the significance of any buried remains.	No change	Neutral	No impact on significance.	No change	Neutral
WHA318	Medieval Curborough deserted settlement	N/A	Low	The Wood End Lane diversion will possibly require the removal of limited areas of archaeological deposits around the site of medieval Curborough, resulting in the loss of some below ground features.	Low adverse	Minor adverse	No impact on significance.	No change	Neutral
WHA319	Boundary bank and earthworks	N/A	Low	The Proposed Scheme will run alongside this asset. There will be no change to the significance of any buried or upstanding earthwork remains.	No change	Neutral	No impact on significance.	No change	Neutral
WHA320	Mare Brook Prehistoric Landscape	N/A	Low	The Proposed Scheme will require the topsoil stripping of the majority of this asset for construction railhead sidings, with the loss of any below ground features.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA321	Ravenshaw Wood relict fields	N/A	Moderate	The Proposed Scheme embankment and landscaping will require the removal of the majority of this asset resulting in the loss of some below ground features identified in geophysical survey (CNo52) and landscape features identified in sketch survey CNo51, including the 'King's Standing' mound.	High adverse	Major adverse	No impact on significance.	No change	Neutral
WHA322	New Farm	N/A	Low	The Proposed Scheme will run 100m away. There will be no change to the significance of any buried remains.	No change	Neutral	No impact on significance.	No change	Neutral
WHA323	Elmhurst Hall landscape park	N/A	Low	The Proposed Scheme will run 600m away and no significant views will be affected.	No change	Neutral	No impact on significance.	No change	Neutral
WHA324	Prehistoric landscape at Bourne Brook	N/A	Moderate	The Proposed Scheme will require the removal of approximately one third of this asset for construction of mainline embankments, temporary workers' accommodation, materials stockpile and the A515 Lichfield road underbridge main compound and compound access. Below ground archaeological features will be lost.	Medium adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA325	Hanch Hall, Farm and Park	Listed building	Moderate	<p>There will be disruption and noise during construction, particularly during alteration of the West Coast Mainline with a new gantry and satellite compound at John's Gorse, and satellite compound south of the line at Saw Lane. This will constitute a low adverse temporary impact and minor adverse effect.</p> <p>The Proposed Scheme will run 250m away beyond the current railway line to the north but it will be on embankment, meaning views may be glimpsed beyond existing and new woodland planting. This will slightly alter the setting of the asset resulting in a low adverse impact and minor adverse effect.</p>	<p>Temporary Low adverse</p> <p>Permanent Low adverse</p>	<p>Temporary Minor adverse</p> <p>Permanent Minor adverse</p>	No impact on significance.	No change	Neutral
WHA326	Medieval Handsacre	Listed building and Scheduled Monument	Moderate	Limited local upgrades to the WCML will not affect the significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA327	Trent gravels	N/A	Moderate	The Proposed Scheme will run more than 500m away. There will be no change to the significance of any buried remains.	No change	Neutral	No impact on significance.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA328	Ryknield Street	N/A	Moderate	The Proposed Scheme crosses this asset at Streethay where remains will already have been removed by the A38.	No change	Neutral	No impact on significance.	No change	Neutral
WHA330	Tamworth Road hedgerow	Important hedgerow	Moderate	The Proposed Scheme cutting and landscaping will require removal of a proportion of the identified length of this asset.	Medium adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA331	Streethay parish boundary	Important hedgerow	Moderate	The Proposed Scheme cutting and landscaping will require removal of a proportion of the identified length of this asset.	Medium adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA332	Pyford Brook hedgerow	Important hedgerow	Moderate	The Proposed Scheme cutting and landscaping will require removal of a minor proportion of the identified length of this asset.	Low adverse	Minor adverse	No impact on significance.	No change	Neutral
WHA334	Tewnals Lane hedgerow	Important hedgerow	Moderate	The Proposed Scheme cutting and landscaping will require removal of a number of sections of the identified length of this asset.	Medium adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA335	Hanch Hall Park boundary	Important hedgerow	Moderate	The Proposed Scheme will not affect the asset.	No change	Neutral	No impact on significance.	No change	Neutral
WHA338	Trent and Mersey Canal – Bridge 53 and Wood End Lock	Listed building	Moderate	<p>Construction activity over and around the canal will continue for approximately 3 years. During this time there will be noise during construction and a lessening of the ability to appreciate the canal structures in their historic rural setting. This will constitute a medium adverse temporary impact and moderate adverse effect.</p> <p>The Proposed Scheme will run less than 100m away on embankment with planting between the asset and the Scheme. Effects will be visual, with historic views from the bridge curtailed by scheme landscaping and earthworks and the canal underbridge in full sight to the north-west. The Proposed Scheme will therefore affect the relationship between the asset and canal. The scheme will result in a medium adverse impact and moderate adverse effect.</p>	<p>Temporary Medium adverse</p> <p>Permanent Medium adverse</p>	<p>Temporary Moderate adverse</p> <p>Permanent Moderate adverse</p>	There will be an increase in noise affecting the asset's rural setting, and there will be views of the trains. This will result in a medium adverse impact. There will also be a medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a medium adverse impact.	Medium adverse	Moderate adverse
WHA339	Trent and Mersey Canal – Wood End Lock Cottage	Listed building	Moderate	<p>Construction activity over and around the canal will continue for approximately 3 years. During this time there will be noise during construction and a lessening of the ability to appreciate the cottage in relation to the canal. This will constitute a high adverse temporary impact and moderate adverse effect.</p> <p>The constructed scheme will be less than 100m away on embankment with planting between the asset and the scheme. Effects will be visual, with historic views from the cottage curtailed by scheme landscaping and the canal viaduct in full sight to the north-west. This will result in a medium adverse impact and moderate adverse effect.</p>	<p>Temporary High Adverse</p> <p>Permanent Medium adverse</p>	<p>Major adverse</p> <p>Permanent Moderate adverse</p>	There will be an increase in noise affecting the asset's rural setting, and there will be views of the trains. This will result in a medium adverse impact. There will also be a medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a medium adverse impact.	Medium adverse	Moderate adverse

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
WHA340	Trent and Mersey Canal	Conservation area	Moderate	Construction activity over and around the canal will continue for approximately 3 years. During this time there will be noise during construction and a lessening of the ability to appreciate the canal in its local setting. This will constitute a high adverse temporary impact and moderate adverse effect.  The Proposed Scheme will cross the canal in three locations and will involve extensive embankments and planting between and around the three bridges. The concentration of scheme elements will considerably change the character and setting of the canal in this location resulting in a medium adverse impact and moderate adverse effect.	Temporary High Adverse  Permanent Medium adverse	Major adverse  Permanent Moderate adverse	There will be an increase in noise affecting the asset's rural setting, and there will be views of the trains. This will result in a medium adverse impact. There will also be a medium adverse permanent construction impact as a result of changes to the setting of the asset. The combined permanent construction and operational impacts will adversely alter key characteristics of the setting of this asset, resulting in a medium adverse impact.	Medium adverse	Moderate adverse
WHA341	Trent and Mersey Canal milepost at SK 1291 1335	Listed building	Moderate	The Proposed Scheme will run less than 100m away with planting between the asset and the scheme. The significance of the milepost will not be affected.	No change	Neutral	No impact on significance.	No change	Neutral
WHA344	Cropmarks at Wood End	N/A	Low	The Proposed Scheme earthworks and planting will require the removal of this asset resulting in the loss of most below ground features.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA345	Cropmarks at Brokendown Wood	N/A	Low	The Proposed Scheme earthworks and planting will require the removal of this asset resulting in the loss of most below ground features.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA346	Ridge and Furrow at Marsh Farm	N/A	Low	The Proposed Scheme earthworks will require the removal of the majority of this asset resulting in the loss of archaeological features.	High adverse	Moderate adverse	No impact on significance.	No change	Neutral
WHA357	Ridge and Furrow at Huddlesford	N/A	Low	The Proposed Scheme earthworks will require the removal of the northern part of this asset resulting in the loss of archaeological features.	Medium adverse	Minor adverse	No impact on significance.	No change	Neutral
WHA358	Cedar House	Listed building	Moderate	The Proposed Scheme will run 200m away to the east, but there will be no long views beyond existing housing and Streethay House Farm. No impact on setting or significance.	No change	Neutral	No impact on significance.	No change	Neutral
WHA359	Streethay House Farm and Farmhouse	Listed building	Moderate	The setting of the asset is predominately characterised by its village context. The Proposed Scheme will not affect this setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA361	Prehistoric landscape at King's Bromley	N/A	Moderate	The Proposed Scheme will run 900m from this asset. There will be no change to its setting.	No change	Neutral	No impact on significance.	No change	Neutral
WHA362	Registered Commons at Huddlesford	Registered	Moderate	Topsoil strip and landscaping works will occur adjacent to parts of this asset along Broad Lane and Park Lane. On Park Lane the Proposed Scheme will require removal of a 200m section of the asset.	Low adverse	Minor adverse	No impact on significance.	No change	Neutral
WHA364	Common Farm	N/A	Low	The Proposed Scheme will run 900m from this asset. There will be no change to its rural and isolated setting or its historic access.	No change	Neutral	No impact on significance.	No change	Neutral
WHA365	Thatchmoor Farm, Whittington Hurst	N/A	Low	The main line of the Proposed Scheme lies over 1km from the asset and will not materially affect it setting or significance.	No change	Neutral	No impact on significance.	No change	Neutral
WHA366	Bears Hay Farm, Hilliard's Cross	N/A	Low	The Proposed Scheme will run 400m away, beyond the current railway line and canal. The scheme will not materially affect the setting and significance of the asset.	No change	Neutral	No impact on significance.	No change	Neutral
